Rosuvastatin moderate dose

Efficacy of short-term moderate or high-dose rosuvastatin in preventing contrast-induced nephropathy: A meta-analysis of 15 randomized controlled trials. Liang M(1), Yang S, Fu N. Author information: (1) aGraduate School of Tianjin Medical University bDepartment of Cardiology, Tianjin Chest Hospital, Tianjin, China. Aug 15, 2014. The guideline identifies high- and moderate-intensity statin therapy for use in primary and secondary prevention (Table 1).

**Rosuvastatin**, (5) 10 mg. To maximize safety in men and in women who are not pregnant or nursing, physicians should select the appropriate statin and dose based on patient. Table 5. Statin Dose Intensity and Equivalency Chart*. Statin. Intensity. %LDL-C. Reduction. HMG-CoA Reductase Inhibitor. **Rosuvastatin**. Atorvastatin. Pitavastatin. Moderate-Intensity. Intensity. (lowers. LDL-C 30% to < 50%). 48. 46. 44. 5 mg. ($196). 42. 20 mg. ($9 gen, $236 br). 4 mg. ($81). 40. 40 mg. ($4 g, $202 br). 38. 10mg. Moderate-Intensity Statin Dosing. High-Intensity Statins. • Atorvastatin 40-80 mg. • **Rosuvastatin** 20-40 mg. Moderate-Intensity Statins. • Atorvastatin 10–20 mg. • **Rosuvastatin** 5–10 mg. Simvastatin 20–40 mg. • Pravastatin 40–80 mg. • Lovastatin 40 mg. • Fluvastatin XL 80 mg. • Fluvastatin 40 mg bid. • Pitavastatin 2–4 mg. Jul 7, 2017. We included RCTs comparing short-term moderate or high-dose rosuvastatin treatment versus low-dose rosuvastatin treatment or placebo for preventing CIN. The primary endpoint was the incidence of CIN within 2 to 5 days after contrast administration, and related parameters including serum creatinine. The chart below shows statin doses expected to provide similar LDL reduction. When choosing a statin dose, expected LDL reduction is. Moderate-intensity (expected LDL reduction 30 to <50%). High-intensity (expected LDL. (max 10 mg).8,9 Rosuvastatin levels are about 50% higher in hemodialysis patients vs patients. CRESTOR® (rosuvastatin calcium) is available in four different doses – 5 mg, 10 mg, 20 mg, and 40 mg. Your dosage may vary, check with your doctor before taking CRESTOR. If cannot tolerate high-intensity statin, then moderate-intensity statin should be used; For patients ≥ 75 years old, risk/benefit ratio should be considered [1]. • Atorvastatin (Lipitor®) 10 - 20 mg a day. • **Rosuvastatin** (Crestor®) 5 - 10 mg a day; Simvastatin (Zocor®) 20 - 40 mg a day; Pravastatin (Pravachol®) 40 - 80 mg a day. • Atherosclerosis. 2015 Apr;239(2):439-43. doi: 10.1016/j.atherosclerosis.2015.02. 003.
